PRNs in the First 40 Years of ACCP

**Suzanne Amato Nesbit, Pharm.D.,
FCCP, BCPS, CPE**

As we prepare to celebrate ACCP's 40th anniversary at the Annual Meeting in New York City, we are afforded the opportunity to reflect on the rich history of the Practice

and Research Networks (PRNs), a vital component of the organization.

The first PRN was the Critical Care PRN, formed in 1992 under the mentorship of Joe Dasta and Barbara Zarowitz. The Ambulatory Care and CNS PRNs quickly followed a few months later. By the College's 30th anniversary, there were 22 active PRNs. Today, there are 26. The goal of the PRNs was, and still is, to bring together clinical pharmacists who have shared interests in both practice and research. The vision was for PRNs to foster professional networking and provide continuing education. More recently, the PRNs have provided members with both valuable viewpoints and professional experience through discussion on the e-mail lists.

It is informative to review the events occurring in the profession of pharmacy at the inception of the PRNs that may have helped shape the need for these networking forums. In the early 1990s, the path toward the Pharm.D. as the entry-level degree was well established. The largest pharmacy organizations at the time had already endorsed the concept, and in 1992, the American Association of Colleges of Pharmacy House of Delegates passed a resolution supporting the entry-level Pharm.D. as the single degree for the profession.

Board certification was growing in the 1990s. Petitions seeking recognition of psychiatric pharmacy and oncology were sent to the Board of Pharmacy Specialties. Meanwhile, the first board certification exams were administered for pharmacotherapy and nutrition support. By 1996, certification exams for both oncology and

psychiatric pharmacy were also offered.

Residency training was also expanding when the ACCP PRNs were being formed. ASHP merged the accreditation standards of hospital and clinical pharmacy residencies into a new Residency in Pharmacy Practice standard. The new standard included experiences in both acute and ambulatory care, drug information, and practice management. Around this time, ACCP initiated a voluntary peer-review process for fellowships.

With the growth of board certification, residency training opportunities, and the Pharm.D. soon to be the entry-level degree for the profession, it is easy to see how it was desirable to create a mechanism for clinical pharmacists to share common interests in education and training, pursue board examination preparation and recertification, and facilitate professional networking. The PRNs continue to provide benefit to their members and the College membership at large. The PRNs foster leadership development, with many elected officers of the College first having experience in PRN governance. The College's Board of Regents often solicits PRN advice when reviewing specialty clinical guidelines or organizational statements seeking ACCP endorsement. The PRNs have the opportunity to provide professional insights and commentaries through developing PRN opinion papers. And of course, the PRN focus sessions allow the entire ACCP membership to learn from experts in the field. As ACCP moves forward, the PRNs will continue to be a strength of the College in helping plot its direction.

Thank you all for your commitment to the success of the PRNs and ACCP. I look forward to the updated histories and other works of the PRNs that will be on display at the 40th anniversary meeting in New York City.

2019–2020 PRN OFFICERS

Recently, members voted for their choice of future leaders for their respective Practice and Research Networks (PRNs). Please join ACCP in recognizing both the newly elected members and those who are continuing to serve their respective PRNs in the coming year.

Endocrine and Metabolism PRN

The Endocrine and Metabolism PRN is composed of pharmacists and student pharmacists from a variety of practice settings. The PRN was formed to achieve the following goals and objectives. (1) Provide an opportunity for pharmacists with an interest in endocrine and metabolism disorders to promote practice, research, and education in these areas. (2) Provide a mechanism for members with similar interests to meet during ACCP meetings to network, problem solve, and discuss professional issues and opportunities. (3) Promote practice involvement; educational needs of health care professionals, students,

and patients; and research activities in the areas of endocrinology and metabolism that might be favorably affected by this ACCP PRN effort. The most recent PRN blog is available at <https://endoprn.wordpress.com/2019/08/15/sglt-2-inhibitors-the-new-kids-on-the-block-for-management-of-diabetic-nephropathy/>. During the past 6 months, notable member accomplishments include the following.

Hematology/Oncology PRN

Introduction

The Hematology/Oncology PRN continues to provide a forum for hematology/oncology pharmacists to network and collaborate on scientific, educational, and political issues affecting clinical practice, teaching, and research. The PRN has 721 members, with trainees (students and residents) making up almost 50% of the membership.

At the 2018 Annual Meeting, the PRN hosted resident and student travel awardees. With a continued increase in student membership and engagement as well as the desire for more opportunities to connect, the second half of the PRN meeting served as a networking session focused on clinical and research activities of the membership. A highlight of the meeting last year was a research presentation given by one of the PRN's student members and travel award recipient. One of the PRN's requests was to increase the involvement of students and residents; therefore, the PRN has activities geared toward trainees. Members also formed three committees within the PRN, which include trainees, to help the PRN officers complete their initiatives, which, over the past year, have included establishing a regular newsletter highlighting member accomplishments, clinical updates, and other topics.

The PRN plans to donate to the Frontiers Fund, and nominations for 2019 awards have been submitted. Plans for PRN collaboration with the Pharmaceutical Industry PRN are under way for the 2019 PRN focus session.

Infectious Diseases PRN

The ID PRN continues to build on its previous successes. Members continue to excel and, in particular, achieve BCIDP status. Look for future recertification opportunities with the brand new IDSAP home study materials! Below is a sampling of professional achievements by ID PRN members.

Promotions

- **Thamer Almangour:** Assistant Professor, Department of Clinical Pharmacy, College of Pharmacy, King Saud University, Riyadh, Saudi Arabia.
- **Mario Beccari:** Clinical Assistant Professor of Infectious Diseases, D'Youville College School of Pharmacy, Buffalo, New York.
- **Rachel Britt:** Pharmacy Clinical Practice Specialist – Infectious Diseases at UTMB Health – Galveston, Texas.
- **Elias Chahine:** Professor of Pharmacy Practice, Palm Beach Atlantic University, the Lloyd L. Gregory School of Pharmacy.
- **Timothy Gauthier:** Clinical Manager of Antimicrobial Stewardship Programs for Baptist Health South Florida.
- **Alan Gross:** Clinical Associate Professor, University of Illinois at Chicago, College of Pharmacy.
- **Monica Mahoney:** Clinical Pharmacy Specialist, Outpatient ID & OPAT Clinics, Beth Israel Deaconess Medical Center, Boston, Massachusetts.
- **Drew Zimmer:** ID Pharmacist at CoxHealth System, Springfield, Missouri.

Board Certification in Infectious Diseases (BCIDP)

Pediatrics PRN

Several Pediatrics PRN subcommittees have been developing new programming and opportunities for members. Highlights are as follows:

Education Committee: Will continue to offer resident/fellow journal clubs during 2019–2020 with plans to pilot a student journal club as well. A big thank-you to the committee for all the work designing the 2019 Pediatrics PRN Focus Session – Medical Use of Cannabinoid Products in the Pediatric Population, to be offered Sunday, October 27, 2019, from 4:30 p.m. to 6:30 p.m. (EST) at the Annual Meeting

Research Committee: Continues to support PRN members in their research and scholarly endeavors. The Pediatrics PRN is excited for the opportunity to sponsor eligible Pediatrics PRN members to participate in the ACCP FIT and/or the ACCP MeRIT program. If approved, the sponsorship will provide eligible applicants with financial support to cover part of the ACCP FIT/MeRIT tuition. More information can be found on the PRN website (<http://pediprn.accp.com/>).

Travel Awards Committee: Continues to support resident/fellow and student members of the PRN with an award to partly defer the costs to attend the ACCP Annual Meeting. Award recipients will be recognized at the Pediatrics PRN business meeting on Monday, October 28, 2019, from 6:30 p.m. to 8:30 p.m. (EST) at the Annual Meeting.

Social Media Committee: Check out the Facebook

(<https://facebook.com/acpppediprn/>) and Twitter (@acpppediprn) accounts for up-to-date information regarding the PRN as well as pediatric pharmacy practice.

Nominations Committee: Is excited to present its recently elected officers: Deborah Bondi (chair-elect) and Cassandra Ruggles (secretary/treasurer). Thank you to all candidates who ran this year and for your continued engagement with the Pediatrics PRN!

Perioperative Care PRN

Members of the Perioperative Care PRN continue to be engaged in research and outreach efforts related to the care of patients undergoing surgery. The PRN's focus session, titled "Red Light ... Green Light ... Red Light: Anticoagulation Challenges in the Surgical Patient," will be held Sunday, October 27, from 2:15 p.m. to 3:45 p.m. The PRN appreciates the work of its Education Committee, led by Chair-Elect Eric Johnson. This summer, the PRN hosted two webinars, which were well attended. The PRN appreciates the expertise of its presenters, Drs. Sara Hyland and Daniel James.

ACCP FOUNDATION UPDATE

Board of Trustees to Share 2-Year Plan for Funding New Initiatives

In the past 9 months, the Board of Trustees (BOT) has received valuable input from individual members, PRNs, and stakeholders.

The BOT is now prepared to begin funding over the next 2 years for new and updated initiatives addressing the Foundation's expanded mission. The plan will first be shared with members attending the Annual Meeting in October. Programs will reflect the Foundation's continued emphasis on supporting research and investigator development as well as broadening the emphasis to include supporting more ACCP members in scholarship and advanced practice.

Congratulations to 2019 Futures Grants Program Awardees

The ACCP Foundation Frontiers Fund is earmarked to support researchers, scholars, and practitioners and to promote research and scholarship to practitioners, trainees, and students. Through its Futures Grants program, the Foundation Board of Trustees is especially interested in supporting the development of research skills among student, trainee, and early-career ACCP members with a goal of establishing sustained interest and careers in pharmacy research.

This year, the ACCP Foundation received 37 applications for its mentored research funding program. Each application was reviewed by an expert panel according to the program's core review criteria. The ACCP Foundation congratulates the 2019 Futures Grants program award-ees. All award recipients will be recognized during the Awards and Recognition Ceremony on Sunday, October 27, during the ACCP Annual Meeting in New York City.

Junior Investigator Awards:

- **Leo F. Buckley**, Pharm.D., Brigham and Women's Hospital – Precision Pharmacologic Inhibition of NLRP3 Inflammasome Activity in Experimental Uremic Cardiomyopathy. Mentor: Peter Libby, M.D.
- **Razieh Kebriaei**, M.Sc., Ph.D., Wayne State University – A Novel Approach for Combating Medical Device Associated Biofilm Infections of MRSA. Mentor: Michael Rybak, Pharm.D., MPH, Ph.D., FCCP, FIDP, FIDSA.

Student/Resident Awards:

- **Andrew Jatis**, Pharm.D. Candidate, University of Iowa College of Pharmacy – Exploration of Prohibitin-1 as a Novel Therapeutic in Glucose Homeostasis and Insulin Signaling. Mentor: Ethan Anderson, Ph.D.

- **Lusi Zhang**, MHI, Pharm.D. Candidate, University of Minnesota – Polygenic Risk for Cardiovascular Diseases, Cardiovascular Medication Burden and Cognitive Performance in Patients with Psychotic Disorders. Mentor: Jeffrey Bishop.

The ACCP Foundation Board of Trustees and staff would also like to express their sincere gratitude to the expert reviewers who served on the Junior Investigator and Student/Resident Award Review committees. Members of the Junior Investigator Award Review Committee were Erin Barreto, Philip Chung, Mariann Churchwell (chair), Alexander Flannery, Jeffrey Fong, Abir Kanaan, Craig Lee, Jeannine McCune, Ian McGrane, Pamela Moye-Dickerson, Keith Olsen, Kimberly Scarsi, Jason Schaefer, and Michael Ujhelyi. Members of the Student/Resident Award Review Committee were Paul Gubbins (chair), Kirolos Hanna, Jason Karnes, Qing Ma, Courtney Mospan, Emma Tillman, Adrian Wong, and Eric Wright.

FUTURES GRANTS TIMELINE CHANGES IN 2020

May 15, 2020: Request for applications opens.

September 1, 2020: Deadline for grant application submissions.

November 15, 2020: Award decisions announced.

For more information about the Futures Grants program, please visit the ACCP Foundation [website](#).

It's not too late to enter a PRN or independent trivia team in the ACCP Foundation Trivia Challenge, which will take place during the Opening Reception of the ACCP Annual Meeting in New York City, Saturday, October 26, 2019, at 7:30 p.m. The Fundraiser Trivia Challenge is a simple fundraising competition that will end with a rousing game of pharmacy trivia. Teams of four will compete to answer questions about clinical scenarios, unusual medical equipment, other pharmacy topics, and potpourri.

[Click here to visit the Trivia Challenge website for more information and to create a team.](#)

Last year, the inaugural Trivia Challenge was swept by the Board of Regents team, winning top score honors and the distinction of the trivia team raising the most money. The Regents already have registered a team for 2020 (“The Boardinators”), so we’d like to encourage as much friendly competition as possible to take on the reigning champions.

Investigator Development

Mentored Research Investigator Training (MeRIT) Program

This one-of-a-kind training program is designed to help pharmacists develop the abilities necessary to conduct investigator-initiated research, either independently as a principal investigator or as an active co-investigator within a research team. Ideal candidates for the MeRIT Program are pharmacy faculty or practitioners with limited research experience who are:

- Committed to incorporating research into their professional careers;
- Interested in generating research themes or obtaining preliminary data for larger funding opportunities; and
- Aspiring to be active principal investigators or co-investigators within a research team.

MeRIT is a 2-year longitudinal program that uses a combination of live and virtual teaching and mentoring methods to provide trainees with the support and education they need throughout the research experience (i.e., from idea, proposal development, funding application, project completion, to presentation and publication). Be sure to visit the 2018 MeRIT participants’ completed research posters and the 2019 MeRIT participants’ research design posters during the Annual Meeting in New York City, Saturday, October 26, from 11:30 a.m. to 1:00 p.m. in the New York Hilton Midtown, Americas Hall I.

The application period for the 2020 MeRIT Program will open in November 2019, with letters of intent to attend due February 28, 2020, and full applications due March 31, 2020. The primer program will be held June 22–26, 2020, on the campus of the University of Kentucky College of Pharmacy in Lexington.

Focused Investigator Training (FIT) Program

The FIT flagship pharmacist investigator training program continues June 22–26, 2020, at the University of Kentucky College of Pharmacy in Lexington. If you are preparing to submit (or resubmit) a research proposal to the NIH or other major foundation/organization funding source, FIT should be on your agenda.

This 5-day intensive, hands-on program has a strong history of participant success, given that it pairs experienced and funded faculty mentors with

investigator-participants. The program is geared to fine-tune R-type investigator-initiated proposals and K-type career development awards. The ideal applicant is a mid-career, fellowship-trained, tenure-track or research-focused pharmacist. The application period for the 2020 FIT Program will open in November 2019, with letters of intent to attend due February 28, 2020, and full applications due March 31, 2020.

Feedback from a past FIT participant:

The focused and protected time to work on my proposal and receive expert/critical feedback on my proposal were instrumental to my receiving funding, and I’ve not been able to reproduce the same experience outside the FIT Program.

More information on MeRIT and FIT will be available at the ACCP Foundation’s booth at the Annual Meeting in New York, or on the website [here](#).

WASHINGTON UPDATE

ACCP’s Efforts to Address Opioid Abuse Highlighted in *Washington Post*

According to the [Washington Post](#), from 2006 through 2012, 76 billion prescription pain pills were manufactured and shipped to pharmacies all over the country, fueling a public health epidemic that killed 100,000 Americans. Central to ACCP’s vision for the clinical pharmacy profession is the belief that pharmacists must be accountable for engineering and overseeing a fail-safe medication use system. As policy-makers and health care leaders grapple with the scale of America’s opioid crisis and how to address it, ACCP has actively been partnering with key allies to highlight areas in which clinical pharmacists can uniquely support these efforts.

Most recently, the *Post* published a letter to the editor written by ACCP President Suzanne A. Nesbit in response to the newspaper’s ongoing investigative series into America’s opioid epidemic. In her letter, Nesbit calls on Baltimore and other communities to develop a comprehensive strategy to combat addiction – including a team-based approach to care that fully uses clinical pharmacists, the health professionals best suited to optimize medication use. National Academies of Medicine Forum on Mental Health and Substance Use Disorders

ACCP participates in a nationally recognized, structured forum to promote data, policies, practices, and systems that affect the diagnosis and provision of care for mental and substance use disorders, including substance-related and addictive conditions. In this capacity, ACCP helps lead the dialogue on a range of issues, including coordination and integration of clinical pharmacists' services in primary and specialty health care delivery systems and standardization of data collection to enable data matching, aggregation, and sharing. American Society of Addiction Medicine (ASAM)

ACCP is currently partnering with ASAM, a professional medical society representing over 6000 physicians, clinicians, and associated professionals in the field of addiction medicine, to promote joint educational programming and other collaborative activities related to addiction medicine. [Click here](#) to learn more about ASAM.

Coalition to Stop Opioid Overdose (CSOO)

Earlier in 2019, ACCP signed on as a member of CSOO, a coalition of local, regional, and national groups committed to advancing meaningful legislative and regulatory policies in response to the opioid overdose epidemic. The coalition seeks to address the U.S. opioid overdose epidemic by engaging policy-makers, public health leaders, chronic pain and addiction specialists, individuals in and seeking recovery, and family members so that legislation and policies receive the support and funding needed. [Click here](#) to learn more about CSOO.

Recommendations to HHS Pain Management Taskforce

The HHS Pain Management Best Practices Inter-Agency Task Force issued a call for stakeholder recommendations on best practices and issue recommendations that address gaps or inconsistencies for managing chronic and acute pain.

In response, ACCP submitted comments calling for the integration of clinical pharmacists as essential team members into the multidisciplinary approach to chronic pain that focuses on the patient's medical condition, comorbidities, and medication management services, including medication-assisted treatment (MAT) services for those with a dual diagnosis of chronic pain and opioid use disorder. [Click here](#) to read ACCP's comments in full.

Legislative Opportunities – Recognition of CDTM in Warren/Cummings Language

Currently before Congress, the [Comprehensive Addiction Resources Emergency \(CARE\) Act](#), introduced by Senator Elizabeth Warren (D-MA) and Representative Elijah E. Cummings (D-MD), would provide states and communities

with \$100 billion in federal funding over 10 years, including more than \$800 million a year directly to tribal governments and organizations.

Of importance, the CARE Act includes a minor but potentially significant provision that specifically recognizes pharmacists providing care under recognized collaborative practice structures. Although the bill is unlikely to advance in its current format, ACCP will continue to work with congressional allies to advance payment for clinical pharmacists' services delivered through team-based structures. Opioid Issue Strategy and Outlook

ACCP's top advocacy priority is focused on helping achieve medication optimization in the treatment of chronic diseases through comprehensive medication management (CMM). Of importance, ACCP fully recognizes that the scale of America's addiction problem goes well beyond simply "getting the medications right." Addressing the opioid crisis that has developed in the 21st century will require meaningful and comprehensive system-wide policy changes that support evidence-based prevention, treatment, harm reduction, and recovery support services.

In partnering with groups like NAM, CSOO, and ASAM, ACCP adds clinical pharmacy's voice and resources to those working to increase access to comprehensive, evidence-based outpatient treatment for patients with opioid use disorders; expand programs to treat substance use disorders – including medication-assisted treatment (MAT); collect public health data; implement other evidence-based prevention strategies; encourage data sharing between states; and support other prevention and research activities related to controlled substances, including education and awareness efforts.

Thus, although ACCP does not believe it appropriate to seek opportunities to advance the College's CMM effort through legislation specifically targeting opioid abuse, the College asserts that clinical pharmacists are essential team members in the multidisciplinary approach to chronic pain that focuses on the patient's medical condition, comorbidities, and medication management services, including MAT services for those with a dual diagnosis of chronic pain and opioid use disorder. In keeping with the organizational vision that ACCP will drive positive changes in health care as the professional organization most influential in advancing clinical pharmacist roles and responsibilities to optimize pharmacotherapy in the prevention and treatment of disease, ACCP's Board of Regents continues to support committing staff time and resources to help ensure the profession demonstrates appropriate leadership amid a recognized public health crisis.

Now Accepting Applications – ACCP/ASHP/VCU Pharmacy Policy Fellow Program

Launched in 2006 under the guidance of Dr. Ed Webb, [the Congressional Healthcare Policy Fellow Program](#) is a

collaborative effort of ACCP, the Virginia Commonwealth University School of Pharmacy, and the American Society of Health-System Pharmacists.

Pharmacists who participate in the program have the opportunity to gain real-world insight into health care policy analysis and development via immersion in the congressional environment. Fellows are actively mentored in legislative evaluation, policy development, research, and writing while integrating practical experience with theory. The [2019–2020 fellow, Dr. Kyle Robb](#), currently works on the minority staff of the [Senate Committee on Health, Education, Labor and Pensions \(HELP\)](#).

The program provides a unique health care policy learning experience designed to demonstrate the value of pharmacy-government interaction and to facilitate practical contributions to the effective use of scientific and pharmaceutical knowledge in government policy development. Fellows spend the first 2 months of the program with each of the professional organizations as members of their respective government and professional affairs staff. In September of the fellow year, fellows begin working in a legislative environment requiring health care input on the staff of an individual senator or representative or a relevant congressional committee.

Fellows typically seek congressional office placement with one of the committees that predominantly deals with health issues such as the Senate Health, Education, Labor, and Pensions (HELP) Committee and Senate Finance Committee or the House Ways and Means or Energy and Commerce Committees.

Applications for 2020–2021 Pharmacy Healthcare Policy Fellow Program

Learn more about the Healthcare Policy Fellow Program by attending the Professional Placement Forum at ACCP's upcoming Annual Meeting, where you can meet Dr. Robb and ACCP staff to discuss the program in person.

Interested candidates should also visit the Pharmacy Healthcare Policy Fellow [website](#) for more information and instruction on submitting an application.

Don't Miss the Exciting Advocacy Session in New York City!

Navigating Regulatory and Payment Barriers to Medication Optimization: Advocating for Business Models That Sustain Clinical Practice (Saturday, October 26, 9:45 a.m. – 11:45 a.m. Nassau Room)

The key to securing ongoing, sustainable revenue streams from public and private payers lies in demonstrating value, outcomes, and savings. The profession has made great strides in developing consistent language around the process of care, but the absence of clear definitions around statewide protocols, collaborative practice, and scope of practice remain barriers to building sustainable, scalable business models and revenue

streams to support clinical practice.

The goal of this session is to discern how legal structures that regulate clinical practice can help establish a common understanding and set of expectations for patient care across the entire health care spectrum, including public and private payers. The attendee will gain knowledge related to how federal laws and regulations – including the Social Security Act, the Affordable Care Act (ACA), and implementation of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) – can advance clinical pharmacy practice through team-based approaches to medication optimization.

The session will also present effective strategies to optimize your advocacy communications with key stakeholder groups, including Congress, Medicare, and Medicaid policy-makers and in outreach to private insurance plans.

ACCP Programs for Postgraduate Trainees

The resident, fellow, and graduate student monthly electronic newsletter highlights membership benefits, important dates, residency programs, individual PRNs, and answers to postgraduate trainee questions. You can preview the newsletter at <https://www.accp.com/resfel/newsletter.aspx>.

You can follow news and events for postgraduate trainees on Twitter [@ACCPpostgrads](#).

Mentoring Program

The ACCP Mentoring Program allows all postgraduate trainee members of ACCP to search for and select a mentor from the database of ACCP volunteer members. Once trainees have selected a mentor, they are encouraged to correspond with their mentor at least monthly throughout their training year. ACCP supports mentors and mentees with monthly e-mails of potential topics for discussion.

Opportunities and resources offered by ACCP are also included in the monthly correspondence. The 2019–2020 program opened August 12, 2019, to residents and fellows seeking a mentor.

Professional Placement Forum

ACCP continues to meet resident- and fellow-specific needs at the ACCP Annual Meeting with programs addressing their upcoming search for a practitioner position. The Professional Placement Forum will feature PGY2 and new practitioner positions to allow trainees to get a head start on searching for their next position. Residents and fellows can also attend a special session on researching, evaluating, and negotiating that first job offer.

Creating Your Digital Brand

The ACCP “Creating Your Digital Brand” toolkit was designed by the 2019 ACCP National Resident Advisory Committee to help students, trainees, and pharmacists develop their professional online presence using sites such as LinkedIn and Twitter. [Click here](#) to begin creating your own digital brand.

National Resident Advisory Committee

The 2020 National Resident Advisory Committee has been appointed and will be chaired by Justin Moore and co-chaired by Louisa Sullivan. Members-at-large serving on the committee will include Aidan Fischer, Shahrier Hossain, Zach Howe, Kyle Molina, Laura Roccograndi, Clara Ting, Amanda Van Matre, Olga Vlashyn, Charlotte Wagner, and Andrew Webb.

STUDENT INITIATIVES UPDATE

ACCP Clinical Pharmacy Challenge: The Pursuit of Excellence Continues

Now in its 10th year, ACCP’s national team competition for pharmacy students returns to the 2019 ACCP Annual Meeting in New York City. This year, from an initial field of 120 teams, eight have advanced through four online rounds of competition to reach the quarterfinals. Below are the 2019 ACCP Clinical Pharmacy Challenge quarterfinal teams and their schedule.

Travel Awards Promote Student and Resident/Fellow Meeting Attendance

ACCP initiated its Student Travel Awards and Resident/Fellow Travel Awards programs to support and encourage student, resident, and fellow attendance at ACCP national meetings as well as to expand opportunities for students and postgraduate trainees throughout the organization. To date, ACCP has awarded almost \$90,000 in travel stipends and complimentary meeting registrations. In addition, many PRNs now offer their own travel awards for students, residents, and fellows, providing even more opportunities for attendees to apply for funding to defray the costs associated with attending the ACCP Annual Meeting.

ACCP thanks the following PRNs and chapters for either donating funds to ACCP Travel Awards programs or sponsoring their own travel awards:

- Adult Medicine
- Ambulatory Care
- Cardiology
- Central Nervous System
- Clinical Administration
- Critical Care
- Drug Information
- Education and Training

2019–2020 National Student Network Advisory Committee (SNAC) Appointed

Earlier this year, ACCP issued a call for applications to student members interested in serving on the SNAC. The College received applications from students across the country. After reviewing these applications, ACCP President-Elect Brian Erstad selected student members for appointment. The committee will convene at the upcoming 2019 ACCP Annual Meeting in New York City.

ACCP is pleased to announce the appointment of the following student members to the 2019–2020 SNAC.

ACCP Student Chapter Award Announced

This award recognizes the ACCP student chapter that has exemplified strength in leadership, dedication in patient care, and passion for professional development through its activities and membership. The chapter's activities should address ACCP's core values of extending the frontiers of clinical pharmacy and promoting dedication to excellence in patient care, research, and education. A key

component of all the core values is the clinical pharmacist's ability to work collaboratively within the health care environment. Each chapter must demonstrate its ability to work with other health disciplines. Please join ACCP in congratulating this year's Outstanding Student Chapter Award, the University of Houston College of Pharmacy. Houston also received the 2018 Outstanding Chapter Award. ACCP will present the officers representing the University of Houston College of Pharmacy with their Outstanding Chapter plaque and \$1000 award during the Student Chapter Forum session on Saturday, October 26, during the 2019 ACCP Annual Meeting in New York City.

ACCP Clinical Research Challenge – Winning Teams to Present Posters at ACCP Annual Meeting

Competition in the 2019 ACCP Clinical Research Challenge (CRC) began February 3 with 82 teams vying for a spot in round 2: Letter of Intent (LOI) submission. Teams achieving the top 40 scores after the initial online Journal Club Round submitted an LOI. Teams achieving the top 20 scores after round 2 were invited to compete in round 3: Research Protocol Development. Round 3 teams were then tasked with developing a research proposal designed to demonstrate the clinical pharmacist's value in providing antimicrobial stewardship services in a small, rural, critical access hospital environment.

Proposals were reviewed by the CRC Review Panel, and submissions ranking in the top one-third were referred for evaluation and selection of awards by the CRC Oversight Panel. Please join ACCP in congratulating the award winners.
